PROJECTS

TuneHub.

TuneHub is a online music streaming platform that allows users to listen to and discover music over the internet. These websites provide access to a library of songs from various genres, artists and allow users to make a own playlist according to there mood.
● The project leverages Java and Spring boot framework for its backend functionality ensuring seamless data handling and server-side operations.
● In other hand SQL manages the data in efficient way.
● The frontend, on the other hand, utilizes a combination of HTML, CSS, Java Script and the React Frame work, resulting in an engaging and user-friendly interface.!

INTERNSHIP

- KODNEST TECHNOLOGIES
  Software Development Intern June 2023 - Jan 2024
  Intern at KodNest, where I acquired practical skills in Java, MySQL, Frontend Technology, contributing to real-world projects and learning directly from industry professionals.

CERTIFICATIONS

- Java Fullstack Development Certification [KodNest Technologies] [February-2024]

TECHNICAL SUMMARY

- Evaluate 150+ hour's hand's experience of practical exercises and examples in the repository content Github.
